Hotshot Delivery Systems

SPECIALIZED' Food Transport Vehicles

Limited only by your imagination!

ABOUT US Delivery Concepts, Inc. is proud to be the original innovator of the most versatile light-weight insulated fiberglass food delivery vehicles available today, the **Hotshot Delivery Systems**.

For over 22 years we have lead the way with our designs and services for the nation's food service industry.

A full service staff will assist you with every facet of planning, designing and financing a delivery vehicle to accommodate any size delivery or event. Our food transport systems will ensure the efficient operation of every occasion while increasing profits and enhancing your company's professional image.

*We look forward to building a partnership with you
and creating a vehicle
to expand your company's capabilities!*

DESIGN Wherever the location, whatever the occasion, we can create a food delivery vehicle designed with various compartments combining heated, refrigerated, ambient and/or frozen, and shelved to your specifications.

EVENTS The **HotShot Systems** are ideal for any size food operation, from corporate/social drop off events to full service lavish receptions. We pride ourselves in creating a vehicle for your everyday catering needs as well as being capable of handling your extraordinary occasions.

TEMPERATURES Our unique design maintains proper food temps throughout compartments at all times ranging from -20° F. frozen, 40° F. refrigeration and 180° F. in the convection holding oven with no additional fuel source.
